

# Service

## A profitable investment

A well-maintained Adventure Golf facility is attractive and generates long-term profits.

Book a service now to give your facility a facelift for the coming season!

Our services stretch beyond delivering top-class Adventure Golf installations. All products need love and care – and City Golf Europe AB’s golf facilities are no exception. We offer various after sales services that will make your facility look and feel like new.

We will overhaul your hole cups, game instructions, flags and flag poles, machine brush your artificial grass, replenish your top dressing sand and more.

If you require more extensive repairs or projects, we may need to get back to you at a later date.

To keep costs down, the customer provides accommodation with internet, WC/shower and cooking facilities for our staff. The accommodation is to be approved by City Golf Europe.

The customer is also required to provide and pay for any hire machinery and arrange for removal of scrap materials and waste. The customer is responsible for supervising the daily work and approving time reports.

### NOTE!

We are trying to meet your wishes so far it is possible but note that our prices are based on that we can visit you as we pass through your area and it is not possible for us to determine a specific date when we are coming to you because we are much affected by the weather which makes it impossible to calculate exactly when we will be at your particular facility.

We will first announce one preliminary estimate of when we will come to you and then we will contact you about a week before with one more exact date. It can differ quite a bit from the preliminary date you have received earlier. It is not possible to book a specific service technician as we will send the service technician who passes your area.

*Prices may be exclusive of VAT.*

// We order the annual service on our adventure golf course because we want the courses to last a long time and for it to be in the very best condition before the season premiere.

Booking the service team from City Golf feels good. They have built the courses and have the knowledge to perform the service in the best possible way, and can also repair if something needs to be fixed. //

Monica Olsson, owner Trosa Bangolf (Sverige)
